Assignment 1

Part 1

Please put together an HTML portfolio of your work with the following features: - a list of your educational/professional history - location, dates, and description - an image of you, suitably sized - a paragraph of personal backstory (lorem ipsum is okay, too) - links to your social media profiles

Your HTML should be: - Semantic: - use appropriate tags for purpose at hand - joshduck.com/periodic-table.html - Properly structured: - html > (head + body) - a declared doctype (we're using HTML5)

Save the portfolio as portfolio.html.

Required Readings

- HTML Tutorials
- HTML Page Structure
- Semantic HTML

Part 2

Open index.html in Chrome. You will be asked 18 questions to make sure you've learned about the existence of elements, tags, attributes, the fact that HTML is structured, and that any element of any page can be selected.

At the end, you will receive a code. Save the code as code.txt.

Required Readings

- Selectors You Should Memorize

Submission

Please zip up code.txt and portfolio.html and submit them on Lore for Assignment #1.
